---

In any fire training course where instruction includes use of a Self-Contained Breathing Apparatus (SCBA), the district may enroll and shall provide a plan of instruction to accommodate students with a condition that interferes with the face piece seal.

Students who are unable to meet all requirements of the SCBA portion of CERTIFIED FIREFIGHTER I or II courses will not be eligible for "state certification", however they will receive a technical college certificate for participation in the fire training course. Where a state certification course is referenced on the district certificate, there will be an indication that competence in use of a SCBA has not been demonstrated.

All students meeting the prerequisites for a course leading to state certification are eligible for program and material fee reimbursement per s. 20.292(1)(gr), Wis. Stats.
